

Your opportunity to learn and develop Industry 4.0 solutions for common challenges!

Working Groups to Learn and Collaborate

Participating companies will learn from each other, plus work together to innovate, adopt and best utilize digital technologies to improve their respective manufacturing business. These potential working groups have been identified by MTechHub members for further exploration and interest level:

IoT Smart Production Cell technology

- This working group will focus on developing a cost effective and easy to implement IoT technology stack for converting SME's existing production environment to Smart production cell manufacturing.

Tuesday July 23rd

8:30 - 10:00 am
